

**MONTHLY NEWSLETTERS** printed on the back of the bills are designed to keep you updated about important issues and events in our community. Please take the time to review the back of each bill so you can stay informed. Newsletters will also be posted on our web page [rollinghillsglencairn.com](http://rollinghillsglencairn.com)

**WATER SYSTEM** Our water treatment facility is managed by **King Water**. To report an after-hours water emergency, call **888-266-7048**. Charge-backs from King Water for residential investigation call outs requested by members will be passed on to the customer. Call King Water for emergencies, not residential maintenance.

The **COMMUNITY DOCK, BEACH AND PIER** are private membership amenities for you to enjoy. Once the gate is installed, if you do not have a keycard and would like one, contact the office. Limit 1 per household. The float will be returned by Memorial Day weekend and will remain in place through Labor Day. This facility is for day use only. There is no overnight moorage!

The **BASKETBALL COURT and BASEBALL FIELD** are available to use on a first come, first served basis. There is a push button light on the light post for evenings. The basketball court closes at 10pm. Please respect the neighbors and do not play after 10:00pm.

### Water Filtration System Replacement and other Water System Information

We are replacing the filtration system in our water plant. Our five filters have reached their lifespan and are struggling to filter our water adequately. This has resulted in fluctuating chlorine levels and discolored water. To stabilize our chlorine levels and relieve some of the burden on our filters, we have converted our small reservoir in the pump house to a chlorination basin. This change is the first step of the filter replacement process. While improving our water quality the conversion has unfortunately slowed our water production. We must all conserve water as much as possible until the project is finished. Your summer water rates may be higher if you exceed 1000 cubic feet per month (7480.5 gallons). Please see the tiered water rate schedule on the billing newsletter. Our engineering firm is Davido Consulting Group, Inc. and our Civil Engineer is Jeff Tasoff. We expect installation of the new filters by November 2022. Following is a list of tasks completed and in progress with projected completion dates.

- Basin Conversion. Completed.
- Pilot Test to insure adequate sizing. Beginning in May 2022.
- Engineering for State Approval in progress. Estimated completion July 2022.
- Ordering of filters from ATEC. End of July 2022.
- New filter installation. October/November 2022.

The diagrams below show the configuration of our water treatment system before (Diagram 1) and after the Basin Conversion (Diagram 2). Until the Pilot Test and engineering is completed, the actual number and size of the new ATEC filters is unknown.

In the meantime, normal maintenance of our water system is ongoing. We repaired the broken large reservoir tank gauge. We replaced the failed alternator switch for Well #3. We replaced the failed large air compressor and tracing for air leaks in the water plant is ongoing. Replacement of the pump and downpipe and screen maintenance for Well #4 is in progress. We are scheduling the screen maintenance and cleaning of well #1R and #3 as feasible. We are doing our best to maintain water service while undergoing a major replacement project. Please bear with us.
